Fats, Oils And Grease, (FOG)

Just as grease clogs your arteries, it clogs the local sewer district's and County's arteries--the sewer system.

A better disposal option is now available - Turn this waste product into biodiesel!

Collecting your grease in a container and dropping it off at one of the locations available in Buncombe County is the best thing to do. For more information go to Cooking Oil Recycling, <http://www.cookingoilrecycling.org>.

If you can't drop it off, dispose of it in the trash can.
